

Blender Market - Advanced Procedural Material Pack v1.3

2025-02-10 16:39:32 [label](#) [我要反馈](#) [下载页面](#)

Blender Market - Advanced Material Pack:

The Advanced Material Pack is a comprehensive collection of procedural material nodes, created in Substance Designer. It includes a variety of customizable materials such as wood, paper, stone, glass, sand, metal, and more.

The materials feature numerous exposed parameters, allowing users to tailor them to their specific needs. They can be imported directly into Blender using the Substance plugin or through the free Substance Player software to generate static maps for use as images.

With unlimited texture resolution support, users can create 8K textures seamlessly.
