## **Lindsey Williams – Natural Elements Preset Collection**

2025-02-10 16:38:02 label 我要反馈 下载页面

An assortment of Lightroom and ACR presets to create rich and deep tones in your newborn photos.

ONLY WORKS with a CCR and a Lightroom.

No refunds will be given for purchases that contain incorrect products.

## Included:

24 color presets that work with the two programs: ACR as well as Lightroom (.Irtemplate along with .xmp files are both included)

These were designed specifically for newborn photography and come with a range of different presets for different types to ensure that they are suitable for any type of lighting and camera setting. The presets won't alter your white balance, therefore I suggest applying the first preset and adjusting your exposure and white balance after which you can run through them to find which ones will work best with your image. A few basic adjustments might be required on certain photos.

Because of the nature of digital products they aren't refundable. Back up your settings in the event, there is a computer failure or damage.
