- 2) To change the settings, double-click on an item.
- 3) Change the Colour in the "Effect controls"

"GIF - Preview.gif" will help you choose the elements.

### What is Liquid motion elements?

Liquid motion elements, referred to as liquid animations or liquid motion graphics, are animated and fluid visual components commonly employed in design, video production, and motion graphics. These elements emulate the traits of liquid substances such as water, ink, or paint, resulting in seamless and organic movements.

In contemporary design and video production, liquid motion elements have gained popularity for their adaptability and capacity to infuse a modern, dynamic essence into visual content. Widely applied in digital marketing, brand videos, and creative projects, these elements serve to engage audiences, conveying a feeling of fluidity and innovation.
