HORNS – 60 Horns, Antlers, Frills & Horn Sockets IMM + VDM: 60 Zbrush IMM and VDM brushes 39 IMM Horns 9 VDM Horns and 5 VDM frills 7 VDM sockets for horns, scattered throughout an IMM and the VDM brush.

More detailed horns than you could throw at an antler! You'll never need to create them again or look around for the closest set of horns that will complete your creation with that missing "something."

Note that the heads of demonstration are not included.

- They are high-poly meshes that have no texture.
- Create some nasty things!
- Made in Zbrush 2019.0
