The Neon Toolbox (PNG, JPG, PDF): We are pleased to introduce the Neon Toolbox, a tool that lets you create custom neon signs with Photoshop!

Simply type in your text or draw your design apply the design of your choice to get the (almost) immediate neon-like effect. You can customize your designs even more with a backdrop to your walls and choosing from a wide range of components such as bars, supports Wall hooks, grids, and so on.

- One-click layer styles apply to the text and forms.
- Layer styles that are fully editable All effects are adjustable to alter the scale of the effect, to the brightness of the neon glow.
- High-resolution backgrounds and elements
- A user guide that explains how you can make use of this toolbox. Neon Toolbox and includes a guide to help you get started.
- Bonus The font is inspired by neon and is great when combined with the styles of layers. Free within the kit!

The following is included in HTML0:

It will arrive in a zip file containing:

- 32 textures for backgrounds (JPG format (6000 x 4000 pixels)
