AI and Adaptive presets are powerful one-click tools accessible from your Lightroom presets tab. They operate in the most up-to-date versions of Lightroom, Lightroom Classic, and Photoshop ACR for desktops. Modern subscription versions of these programs excel in detecting and isolating specific attributes, including background, sky, subjects/people, and individual parts such as Face Skin, Body Skin, Eyebrows, Iris & Pupil, Lips, Teeth, and Hair. This ensures a refined and precise selection for enhancing specific elements in your images.

What is Quick Fix (AI) Toolkit Lightroom Presets?

Quick Fix (AI) Toolkit Lightroom Presets are a set of pre-configured adjustments designed to enhance and streamline your photo editing process within Adobe Lightroom. These presets are built with artificial intelligence (AI) technology to automate various editing tasks, such as color correction, exposure adjustments, sharpening, noise reduction, and more.

The "Quick Fix" aspect implies that these presets are tailored to quickly improve the overall look of your photos with just a few clicks. They're especially useful for photographers who need to edit large batches of images efficiently without sacrificing quality.

The term "Toolkit" suggests that these presets offer a diverse range of editing options, allowing users to choose from various styles and effects to suit their specific preferences and the requirements of their projects.
