Aescripts ColorX

ColorX is an advanced, intuitive color grading tool designed to achieve creative, high-quality looks for footage quickly. It offers five modes—Hue, Hue Custom, Saturation, Lightness, and Advanced—each enabling precise control over color adjustments. In Hue mode, users can modify hue, saturation, lightness, and density for primary colors. Hue Custom mode allows the selection of specific colors with a color picker, and Saturation mode enables adjustments in areas defined by saturation. Lightness mode adjusts colors within lightness ranges, enhancing details in shadows and highlights.

Advanced mode offers detailed manipulation with customizable hue, saturation, and luminance ranges, including mask refinement and inversion. ColorX supports both Adobe After Effects and Premiere Pro, is GPU-accelerated, and is available for Mac and Windows, providing professionals with robust, flexible color control for unique grading effects.
