MUSICAL

The foundation of any good film is its musical bed. Our mission is to provide you with these deep and droning atmospheric layers of music in which you can lose yourself to thoughts, memories, and emotions.

SOUNDSCAPES

Animals, city sounds, waves, water, fire, winds, and a sailboat. The complete soundtrack you'll need for your travel film or to spice up your music videos. The sound ranges from crisp, clear, and abstract to various remixes.

WOOSH!

The wooshes are field recordings that we experimented with. The sounds of wind and waves start to sound like something out of the ordinary when you begin roughening them in post. They are great to use as transition sounds in editing your music videos.

HANDMADE

The sounds were recorded with our good close friend Julian Lindenmann, who is responsible for most of our SFX transitions. Some of them are crisp and clean; on other occasions, he used some magic on the table to make the sounds more abstract. You can use it as an environmental documentary or an epic story.
