Gumroad – Road Markings Generator 2.0 for 3ds Max: ROAD MARKINGS GENERATOR is a script that's efficient in automatically creating a 2D Mask of road markings in 3dsMax. It is able to be used in a variety of ways for Archviz projects and saves lots of the time of 3D artists.

- Create custom pedestrian crosswalk lines that can be editable.
- Editable Street side, middle dashed lines, and continuous lines.
- Utilizing custom maps that include the correct UVs that are applied.
- Presets that are ready-made, and have the possibility of altering the elevation.
- Supported by 3dsMax 2018, or higher
- Compatibility With Corona Renderer & Vray Renderer
- Version: 2.0
