

Aescripts Joysticks ‘n Sliders v1.7.10

2025-02-10 16:41:32 label 我要反馈 下载页面

Pose-based rigging for After Effects with endless applications.

Joystick controllers are widely employed for 3D character rigging, particularly for facial animation. Utilizing this tool, you just need to select five consecutive keyframes to symbolize your origin as well as your left, right top, and bottom extremities. Once you have those layers set, it is easy to create a joystick controller for the stage, which will be able to interpolate between these extremes appropriately.

Gfx plugin details of Aescripts Joysticks ‘n Sliders v1.7.10

The product is in the **After Effects Plugins** category from **AeScripts**, for more information about this post, you can click on the home page link in the sidebar.

To search for similar products to Aescripts Joysticks ‘n Sliders v1.7.10,

Does this product work on Windows and Mac Os? We mostly include the operating system in the title. If it is not written, it will work on Windows, and you can for the Mac version.

New Changes:

- Bugfix for AE 23.4 and UISliders.
- Update licensing framework to 4.1.4

For a variety of characters, it is possible to use replaceable parts, such as mouth packs that can be adjusted to various angles. Joysticks 'n' Sliders lets you make the Switch Template to help you automate the switching of these components based on your joystick's location.

Sliders function similarly to joysticks. While they might seem more complex than joysticks in control of your animated sequence, they are far more effective. As opposed to joysticks, there is no limit to the number of posts you can make by layering your layers. Furthermore, you can mix them up however you want. This is great for creating mouths, eyes, hands, or even a series of poses that cover a person's entire body. It is also a great tool to create motion graphics or abstract animation.
