X-LAB Mavic Specialized Film Color Looks: The X-LAB specialized film collection comprises five select Presets.

This pack offers Color grades that push the limit of creative cinematic treatments while maintaining a sophisticated look. The presets range from deep shifted orange variations, high contrast yet still detailed noir black and white to deep, intense, highly colorful, attractive shades which give your films a unique film look.

The presets are fully compatible and work beautifully with the Mavic Pro, Mavic Air, and Phantom 4 Pro when set on the D-Cinelinek and -3 Contrast / 0 Saturation settings.
