# Aescriprs AI Color Match v1.3.3 (Win, Mac)

2025-02-10 16:38:32 　　label 我要反馈　　下载页面

Aescriprs AI Color Match v1.3.3(Win, Mac) provides advanced color correction, grading, and matching capabilities for Premiere and After Effects.

How to adjust color, contrast, exposure and white balance in several images in After Effects?

You can edit and design your project using "Aescriprs AI Color Match".

The latest version offers significant improvements, including a 20x speed increase and an added intensity slider.

"Aescriprs AI Color Match" Samples:

Key features include matching hue, contrast, exposure, and white balance across multiple images, replicating the grading of favorite film scenes, and ensuring footage consistency across different cameras or settings.

The software operates locally on Windows and Mac (both Intel and Apple Silicon), ensuring data privacy. It includes an unlimited free trial with a watermark and various bug fixes and performance enhancements. Note: Users must reapply "Match Here" on existing projects due to this update being a breaking change.
