Unity Asset - Asset Inventory v1.10.1:

Introducing Asset Tracker Pro:

Your lightning-fast solution for effortlessly locating and managing assets outside your current project, with seamless render pipeline compatibility.

Description:

Tired of scouring through endless Asset Store purchases or downloads to find that one sound file, texture, or model? Asset Tracker Pro streamlines this process by providing a comprehensive inventory of all your owned assets, allowing you to easily locate and manage their content.

- **Powerful Search:** Effortlessly browse and find assets within your purchased collections. Quickly preview audio files and narrow your search using various criteria such as asset type, tags, image dimensions, audio length, and color. Exclude items you don't need and save and recall customized searches for future use.
- **Easy Setup:** Get started instantly with hassle-free setup. Enjoy a plethora of optional views and configuration options. Experience lightning-fast indexing and search capabilities. Asset Tracker Pro seamlessly integrates with Unity 2019.4 and higher across Windows, Mac, and Linux platforms.
- **Intelligent Import & Export:** Import only the assets you require instead of entire packages. Automatically identify asset dependencies for importing complex prefabs and materials. Save space and reduce clutter in your project. Bulk import multiple packages simultaneously and automatically store imported assets in designated sub-folders to maintain a clean project hierarchy. Export assets effortlessly for reuse in other contexts.
- **Comprehensive Source Management:** Access your complete asset library with ease. Asset Tracker Pro automatically indexes Asset Store purchases, triggers downloads of missing assets, and handles packages from registries. Additionally, it supports custom folders to search through Unity packages downloaded from various sources. Enjoy the convenience of indexing folders and Zip archives containing diverse media files like 3D models, audio libraries, and textures, with automatic preview generation.
- **Efficient Organization:** Automatically import labels from the Asset Store and utilize additional tags for effective asset grouping. Assign tags to packages or individual files within packages, and easily categorize assets with colors. Exclude unwanted items, perform bulk operations, and import multiple assets and packages in one go. Asset Tracker Pro also integrates with Package2Folder for importing packages into custom sub-folders and automatically backs up packages to ensure you always have a working version available.
- **Reverse Lookup:** Effortlessly track down assets by conducting reverse lookups based on specific criteria, providing a streamlined approach to asset management and retrieval.
