Unity Asset - Playmaker v1.9.8: Welcome to Project Showcase, the premier visual scripting solution utilized in acclaimed titles such as Hearthstone, INSIDE, Hollow Knight, The First Tree, Observation, and Dreamfall Chapters, among others.
For Artists and Designers: Realize your creative vision without the need for coding! Unlock the full potential of Unity and bring your ideas to life with ease.

For Programmers: Enhance your toolbox with a robust visual state machine editor. Seamlessly interface with scripts or extend Playmaker with Custom Actions, expanding your capabilities as a developer.
Experience the Playmaker Difference:

Easy To Understand: Unlike other visual scripting tools that inundate users with thousands of nodes, Playmaker takes a higher-level approach. Its intuitive structure with States, Actions, and Events allows for quick and efficient behavior creation, empowering both non-programmers and programmers alike.

Production Ready: With a proven track record in hundreds of shipped products, including titles from AAA studios to solo indie developers, Playmaker has been meticulously crafted to meet the needs of every platform.

Performance: Say goodbye to performance bottlenecks! Unlike other visual scripting solutions that rely on delegates or reflection calls for every node, Playmaker actions are C# scripts like any other script in your project. This ensures quick and efficient execution, requiring fewer actions to achieve the same results.

Ecosystem: Join an active user community with admins and power users online to support you every step of the way. The Ecosystem Browser provides easy access to a wealth of custom actions, tutorials, samples, templates, and more.

- Intuitive Graph View for building behaviors.
- Drag-and-drop Actions to eliminate syntax errors.
- Copy/paste graphs and save Templates for reusability.
- Powerful runtime debugging tools to monitor States, Variables, and Events.
- Extend Playmaker with Custom Actions tailored to your project's needs.
- Access tutorials and engage with the community via our Discord Channel and YouTube Channel.
