Animations in Adobe After Effects Fundamentals: This is the complete making of animations using the Adobe After Effects course for learners and self-taught users.

Motion graphics are essential to your animations on social media and online. Visual effects can add more energy to your animations, making them more enjoyable to watch and even more enjoyable.

This course is mainly geared toward beginners who have never utilized After Effects before but also for those who are familiar with something After Effects or are just self-taught and would like to gain more understanding of animating basics with Adobe After Effects.

Who should this course be intended for:

- Social Media Marketers
- Web Animation Creators
- Beginning Animators
- Animation professionals who want to take their work into the future

Adobe After Effects is either trademark registered or owned by Adobe across the United States and other countries.
