Pixelmania NNFlowVector v2.3.0 for Nuke 15

2025-02-10 16:43:32　　label 我要反馈　　下载页面

Pixelmania NNFlowVector v2.3.0 for Nuke 15:

NNFlowVector is an advanced optical flow plugin for Foundry's Nuke, leveraging AI and deep learning technologies to generate highly accurate motion vectors.

The plugin supports native overscan handling and uses GPU acceleration via NVIDIA's CUDA, enabling efficient processing of high-resolution images with limited VRAM.

Compatible with Nuke 12.0 and later, including Nuke Indie, NNFlowVector operates as a standalone, production-friendly tool that does not require an internet connection.

By utilizing state-of-the-art neural networks, it delivers superior accuracy and cleanliness compared to traditional mathematical methods.
