Learn more about HTML0.

- You'll be able to make your work in Adobe Photoshop
- You can make animated comic book intros using color halftone effects and 3D logo animation
- It will allow you to utilize Adobe After Effects to a basic level and begin animating using keyframes
- You'll be able to create and save your animation art in MP4, AVI, MOV, and many more formats.

Requirements

- There is no prior knowledge required to enroll in this course.
- You'll need a computer running the following programs: Adobe After Effects CC, Photoshop, and Media Encoder.

Description

- **comic Book The title**: Latifa - The Bedouin Blade
- **Superhero's Name**: Latifa, created by Fahad F. Saud and Stan Berkowitz

Latifa which means "kind" in Arabic - is the first Arabian Comic Superheroine. She is the only avenger fighting the invading mutant hordes who destroyed the lands that she once called home. As a child, she was abandoned during the wars. Latifah is not scared of anything and is extremely determined.

Have you ever wanted to know how to make stunning comic book introductions and animations, but aren't sure where to begin or what questions you should ask? This is the right place to begin. If you're the biggest fan of comics and superheroes, this is the course for you.

With **After Effects CC 2022** numerous tools and effects, You can transform ordinary things and transform it into something truly extraordinary.

The aim of this class is to get you acquainted with After Effects in the shortest time that is possible. It is not my intention to cover all features of the program, but in reality not even close to it. Instead, we'll focus our attention on the tools you require to master basic animations for comic books and to learn how to create your drawings using **Adobe Photoshop 2022** through creating halftone effects and dividing flat images into layers, pieces, and components which will be moved inside within After Effects, then export your final artwork with the smallest achievable file size. Adobe Media Encoder.
