下载页面

In this pack of presets, you will receive 114 desktops pre-sets. In the zip file. You will find two folders, one folder for XMP files and another to store LrTemplate files. For the latest versions of Lightroom utilize XMP. For older versions, Use LrTemplate. If you aren't sure which version you're using? Do an internet search to confirm.

These preset allow you to begin editing from a suitable starting point. You will have to alter the White Balance and Exposure to be in line with the image. Keep in mind that these presets may be a one-click flurry but most of the time you'll need to adjust the exposure as well as the WB first.
