Blender Market - Kaboom v1.5.6:

"Kaboom" by Picto Filmo is a Blender addon designed to simplify the creation of destruction animations, compatible with Blender 3.3.x on Linux, macOS, and Windows. The addon requires models to be manifold for proper boolean operations. The workflow consists of six main steps:

1. **Fracture:** Simplify the fracturing process of your model, or import pre-fractured models.
2. **Blast and Krumble:** Animate the dynamics, allowing for real-time adjustments to create crumbling effects and explosions.
3. **Bake:** Convert your dynamics animation into keyframes with a single click.
4. **Rough Cuts:** Add realistic rough cuts to the fractured surfaces to enhance realism.
5. **Debris:** Automatically generate debris particles based on acceleration variations, with customizable settings and easy deployment across all particle systems.
6. **Smoke:** Generate smoke effects with one click, customizable for different smoke behaviors, such as trails or blasts.

Once everything is set, bake the smoke cache and render your destruction animation.
