Instagram Link Sticker Remembrances is a collection of 8 animated elements that can be used in your Instagram stories. It is crucial to direct your viewers' attention to the right place in your stories, as Instagram has replaced swipe-up links by stickers. Select one of these elements and click to apply it. Each element can be easily adjusted in color, text, size, position, length, and other parameters. An easy-to-follow video tutorial is included in the project for complete beginners.
