MotionVFX - mVCR:

The mVCR plugin for Final Cut Pro X (FCPX) offers a collection of retro film effects designed to evoke nostalgia and recreate the aesthetics of the VCR era.

With one-click footage adjustments and a built-in proportions rig, the plugin automatically aligns all elements for seamless integration.

It includes 30 customizable effects compatible with macOS (10.14.6 and above) and both Apple silicon and Intel chips. The plugin is perfect for adding a vintage vibe to openers, logos, teasers, TV shows, family videos, and more. It transforms storytelling with distorted retro visuals to evoke emotions and memories while delivering legacy aesthetics in a modern, user-friendly form.
