Alexander Painter, a composer, songwriter, and multi-instrumentalist based in Brighton, UK, employs unconventional approaches to instruments such as cello and saxophone. Experimenting with analog tape saturation, granular delays, feedback, and more, he blends his recordings with a strong acoustic nature rooted in the real world. Influenced by sonic pioneers like Delia Derbyshire, Arthur Russell, and Sonic Youth, Alex's goal is to craft a unique musical palette.

This sample pack, inspired by Alex's musical toolkits, features morphing, textural pads, rich swells, and percussive rhythms suitable for trailer music, songwriter production, hip-hop, and drum 'n' bass.

Alex has collaborated with various acts and artists globally as a recording artist and live performer. He co-founded the experimental DIY record label Anti-Ghost Moon Ray.

The loops in this compilation cover tempos from 70 to 162 BPM, offering an expansive pitch range for limitless creativity. Whether you're looking for plucked or bowed cello loops or unique percussive sounds from a cello's body, Deep Sampled Vol.1 - Cinematic Cello promises a comprehensive and immersive musical journey.
