Luftrum 28 Phase Plant Presets:

Discover Luftrum 28, an intricate fusion of contemporary synth sounds seamlessly interwoven with timeless echoes from the past. This latest addition to the Luftrum series of synth sound sets unveils 75 meticulously crafted presets by Luftrum, intricately tailored for Phase Plant by Kilohearts – a renowned synth powerhouse celebrated for its amalgamation of analog, wavetable, and granular synthesis, offering boundless modulation possibilities.

Embark on a sonic journey with Luftrum 28, where cutting-edge bioluminescent pads, expressive poly synths, and revered classic emulations converge. Immerse yourself in the nostalgic allure of 80s-inspired basses and leads, cinematic split-key ensembles, transcendent synth keys, ethereal plucks, and ethereal psybient timbres.

Drawing inspiration from a diverse palette of artists and genres, with a focus on the ambient side of electronic music and a nod to the retro vibes of the 80s, Luftrum 28 pays homage to luminaries such as Vangelis, Jon Hopkins, Madonna, Boards of Canada, and Imagination. It serves as both a nostalgic tribute to the greats and a fertile ground for cultivating innovative, photosynthetic musical life forms.

Reflecting Luftrum's cosmic curiosity, the sound set features captivating audio samples sourced from NASA's archives. Experience the mesmerizing hum of the Sun, transformed into an awe-inspiring pad, or witness the celestial ballet between Earth and the Sun, where charged plasma particles dance in the vast expanse of space.

Luftrum 28 presents two versions for optimal flexibility: the original set, boasting high polyphony and polyphonic effect chains, and an Eco version optimized for reduced CPU load. The Eco version includes limitations on polyphony, effect chains, and granular performance, making it ideal for systems with lower processing power.

Each preset is equipped with 8 assigned macros, complemented by meaningful controls for velocity, mod wheel, aftertouch, and added dB headroom, providing a confident and customizable crafting experience. An included PDF guide offers clear instructions for installing the sound set. The complete set, including extras, occupies 419 MB, while the soundbank alone is 109 MB, requiring Phase Plant v2.1.0 or later.
