

Mettle Plugins Bundle 2024.2 for After Effects

2025-02-10 16:43:32 [label](#) [我要反馈](#) [下载页面](#)

Mettle Plugins Bundle 2024.2 for After Effects:

FreeForm Pro: A professional-level 3D mesh warp plug-in for After Effects, enabling transformations such as terrain creation, morphing shapes, and water simulation, ideal for character animation.

How to design a unique project using plugins?

You can use the "Mettle Plugins Bundle" to design your project.

It features Mesh Warp, Displacement Mapping, and Render Primitives tools, and is compatible with 360° immersive tools and the GEOLayers2 plugin.

FLUX: A 360° 3D volumetric fractal flames plug-in for After Effects and Premiere Pro, used to create stunning backgrounds and nebulae. It includes presets, mutation randomization, various render modes, and GPU acceleration. Features include clipping volumes, OBJ file support, and force field controls.

Mantra V2: A 360/VR/AR stylization FX plug-in for After Effects and Premiere Pro, supporting AR formats USDZ and glTF for Adobe Aero and Apple Reality Composer. It offers stylization effects for flat and 360° formats, AR content creation tools like Mantra ObjX for 3D format import/export, Mantra Spherify for converting 360° footage into 3D spheres, and Mantra Graphix for 3D shape creation from 2D graphics. Additional features include a node-based panel, audio-reactive effects, and a globe preview.

ShapeShifter AE: is a versatile and powerful plug-in for Adobe After Effects, designed for creating and animating 3D shapes. It supports 360° compatibility and is integrated with Immersive Tools in CC 2018 and later versions. Ideal for designing 3D logo animations, backgrounds, and morphing shapes, ShapeShifter AE offers upgrade pricing for existing users.
