Timeinpixels Plug-ins Bundle V2022 color corrector with monitoring kit with three plug-ins

- Nobe Color Remap plug-in to color mapping It is more user-friendly and efficient as 3D Lut Creator.
- False Color False Color plug-in offers a false-color preview of all hardware monitors available that are available.
- No Display preview monitor plug-in that can direct output DaVinci images directly to Nobe Display. No Display window and place them wherever (the plug-in has to be installed into the final color node)

Nobe Color Remap simplifies the post-production process, without sacrificing quality. You will get cleaner, more precise results and fewer hassles throughout the process. False Color Plugin is one of the most efficient tools used for monitoring exposure and shot matching. No Display makes usage of other screens and also mirrors the Color Grading Suite display to allow to facilitate monitoring.

Nobe Color Remap v1.83

Nobe Display v1.53

A version of software supported:(Win plug-in supports all software, Mac plug-in only supports DaVinci)

DaVinci Resolve 14,15 17 or later
