Blender Market - Super Parent v1.5.1:

Introducing the Super Parent add-on for Blender, enabling quick parent creation for selected objects while maintaining their hierarchy.

Users can set an Empty Object or a surrounding Cage Mesh as the parent, and even parent all objects in a collection with the "Whole Collection" option.

The add-on includes an experimental feature for auto-resizing cages based on scene changes.

Additionally, Super Parent offers Colored Wireframes in Solid Views, allowing customization of wireframe colors for better visibility.

This feature remains useful even with Blender 4.0's default colored wireframes.

Users can adjust settings in the Object Properties panel under Colored Gizmo.
