To search for similar products to AEScripts Dupli-Kit,

Does this product work on Windowns and Mac Os? We mostly include the operating system in the title. if it is not written, it will work on Windows, and you can for the Mac version.

In order to duplicate objects:

1. Choose one or more items.
2. Click Duplicate
3. If you are the first to duplicate an object with Dupli-Kit The selected layers duplicate in the same position. Set the properties, change the quantity of duplication, and select the duplicate button. You can alter offsets for duplicates at any point. After duplicating, select the parent layer, then go to the effects panel. You can then change values in the offset properties boxes.

Option to Randomize

Gives random values within a specified interval to the characteristics of transforms on the layers selected.

New changes:

- Cmd + clicking function on Mac OS solved (on the duplicate button, anchor point management, and layer arrangement section).
- Some other things were updated.
