Kodak Master Pack Kodak Master Pack brings you an entirely new method of editing that combines actions and presets. The program that emulates the color profiles of the scans that come from Frontier and Nuritsu contains 12 presets as well as 9 color profiles derived from films that are popular with Kodak like Kodak Ektar 100 and Kodak Portra. The stunning results when you apply the presets using the double exposure effect gives you the impression as if you shot authentic films using effects and colors.
