Made these LUTs to Improve the Appearance from my Canon EOS R and here are my preferred settings.

Canon Log - The default settings are great (EOS Original Color Matrix & Attributes at 0,0,0). This will Provide you a Great Deal of dynamic Selection and Comfort with your footage. In this setting, certainly shoot together with the Finest codec you need available. (by Way of Example ALL-I Rather than IPB)

Picture Profile Neutral - (Sharpness in +1 | Contrast at -3 | Saturation in -3 | Color tone). This may look decent straight from camera by pulling Rear the contrast and saturation, that provides a little more space to operate. I Often use this together with the milder codec as it will not undergo any Intensive colour grading. Nice in the Event You Want to document for Quite a While And do not wish to overflow your hard drives.

HOW TO USE?

- If you are unfamiliar with how to use LUTs, have a look at my guide on Premiere.
- But in case you are on a different editing program, look up a few LUT tutorials to your editing program.
- Depending on which colour profile you've filmed with, start up the Corresponding folder and you will find 5 LUTs to select from.

LUTs

- Cinema Jet pack-This was created specifically to match greater end Cameras like the RED or Arri Alexa. It is now my GO TO LUT.
- Equator - A gentle warm appearance. I Enjoy this one in character or when I am traveling to tropical areas. When There's a pina colada at the Shooter, this really is the LUT to utilize!
- LAPD - A dim cod desaturated rocky appearance. I enjoy using this LUT when I am In metropolitan regions surrounded by skyscrapers.
- Quickfix - This is a Really fundamental LUT that can get your footage appearing prepared Out of C-Log or Neutral. Simple but powerful Once You're not searching to stylize much.

Silverlake - The Stylish Hipster Appearance which makes everything seem like a Music festival. Throw in some Digital Audio, fall in this LUT, and It is party time!
