Twig & Olive: Noor Film atns: Discover the Noor Film Photoshop CC Action set, Twig & Olive's go-to for sessions shot in less-than-perfect light conditions—whether rainy and overcast or post-sunset on cloudy days. Never compromise on the quality of images for your clients! Noor Film Actions infuse a subtle glow, enhance highlights, and restore tonality. A valuable bonus is their effectiveness on blue hour and golden hour photos. As a guideline, these actions yield optimal results for images captured in open shade or during the golden hour.

Included Actions: B+W Coals | B+W Steam | Bask | Brilliance | Drift | Embers | Gloss | Glow | Kindle | Lumiere | Lunar | Lustrous | Mist | Polished | Radiant | Singe | Spark | Storm | Swelter | Thaw | Tinder | Urban Haze

Compatibility: Exclusively for Adobe Photoshop CC, this set is incompatible with CS6 and earlier. It does not work with Adobe Lightroom, Lightroom CC, Lightroom Classic CC, Adobe Camera RAW (ACR), or Adobe Photoshop Elements.

Usage Tips: Actions are designed to streamline your workflow by providing a consistent starting point. While 1-click edits are rare, adjust the action's opacity in the layers palette to achieve your desired look. These actions mimic the look and feel of Lightroom Presets with the same namesake, leveraging the Camera RAW Filter in Photoshop CC. Each action creates a single layer, except the B+W actions, allowing for personalized adjustments of layer opacities.
