Aescripts BAO Distortion Selector v2.2 Pre-Activated

2025-02-10 17:06:58　　label 我要反馈　　下载页面

Get Substantial control over observable effects, for example, puppet instrument and liquify... it is possible to specify the place that the distortion is employed to using definable smoothness.

- **BAO Distortion Selector** 2 provides you control over observable outcomes: the zone influenced by stimulation!
- Define Regions with Masks or Luma matte. CS6 & CC consumers may use the newest Feather mask instrument to get control.
- Insert While many selectors because you need on a single coating and receive independent control over every effect or set of outcomes.
- Maintain Control on your distortion with time, eliminate each selector using a Click.
