Beginning using Paint Link

Learn to utilize Photoshop's award-winning brushes. Draw directly onto the frame of your work and be amazed at how Paint Link automatically syncs your modifications into After Effects, enabling real-time previews without the need to render.

A One-Click Workflow

With a single click, Paint Link forms a dynamic link between your project and a brand-new PSD. This eliminates the requirement for saving, rendering, or manually managing your files.

An Onion Skin To Any Workflow

It is highly adaptable. Onion Skin is designed to help any project or workflow. Find out the ways Paint Link will adapt to your workflow.

Perfect For Collaboration

Paint Link allows you to transfer project files to your colleagues. Ideal for workflows that involve teams.

Automatic File Management

Paint Link automatically syncs your files to keyframes specific to the After Effects timeline. This removes the need to manage files while keeping full control of your work.

real-time workflow

Paint Link updates After Effects in real-time while creating images in Photoshop. This video was shot in real-time in order to demonstrate the process.

New Changes:

- removed the Add VFX keyframe button.
- Added a VFX mode checkbox.
