Vignette Fabric Photoshop Action GraphicRiver-29708987 (JPG)

2025-02-10 16:51:33   label 我要反馈   下载页面

Save hours of work with this action. The best measurement for processing will be pix 4500×4500 pixels and 300 DPI. After the motion ends the work you get a well-organized and structured file with the many layers, folders, and settings to enhance the last result.

This motion has been created and optimized for use on Photoshop CS6 or CC++ and ONLY FOR THE ENGLISH VERSION OF PHOTOSHOP

How to configure Photoshop to work with actions.

- Make positive you are the use of the English model of Photoshop. Each motion has been created and optimized to work solely with the English model of Photoshop, so please make positive that you are the use of this version.
- Use the RGB Mode and eight Bits color. To test these settings, go to Image-> Mode and take a look at the "RGB color" and "8 Bits/Channel".
- Make certain that the choice "Add 'copy' to Copied Layers and Groups" becomes on. This choice applies solely to CS5 and later variations of Photoshop. On the "LAYERS" panel, click on on the menu icon, go to "Panel Options…", and test that the "Add 'copy' to Copied Layers and Groups" becomes on.
- Use an image with 72dpi or higher. If you are the use of a photograph with much less than 72dpi, the motion will no longer characteristic correctly. To restoration, this, go to Image-> Image Size and expand the decision value.

How to mix my actions?

- Open your photo
- Play the first action
- Save the end result as an image
- Open the before saved image
- Play the 2nd action
