Boost video quality readily for hazy, underwater, and low-light footage.

**ClearPlus** is a strong plugin designed to boost footage such as fuzzy, underwater, and low light movies, and it's also perfect for skies enhancement. Make the colors pop in a simple and flexible manner.

Shadows/highlights permit you to correct different areas of the picture while maintaining a natural appearance. The shadows slider, together with the dehaze slider, can recuperate the darkened locations and maintain the general image apparently. Particularly for low light pictures, even if caught in hazy/foggy nighttime. In addition, the histogram slider may further enhance image contrast while maintaining overall equilibrium working with the innovative histogram equalization algorithm.

Use it for underwater color correction, the dehaze slider together with white balance enables you to get a natural and very clear picture with no effort.

**ClearPlus** plugin is GPU accelerated for Adobe After Effects and Adobe Premiere Pro.

### New Changes:

- Support for Multi-Frame Rendering
- Support of Apple M1 Silicon
- Add details slider
