

Gumroad - Dronecam for Blender

2025-02-10 16:43:47 [label](#) [我要反馈](#) [下载页面](#)

Gumroad - Dronecam for Blender is an FPV Drone Simulator Addon for Blender that permits drone piloting in real-time through the viewport using a gamepad or remote controller. It provides an incredibly realistic flying experience by modelling all relevant aspects of the environment, such as gravity, drag and thrust. Unlike Blender's native Fly mode, or using a space mouse, DroneCam applies weight and inertia to the camera so that it moves naturally. People can traverse the scene, fly and render in it, or use it as a simulator for drone flying.
