Aescripts Tool Launcher v1.4.2 (Win, Mac): Run scripts, menu Commands, and employ sayings, from a searchable listing or custom toolbars. Open script ports from anyplace in pre-docked panels.

Do You've Got plenty of Scripts that you only use once in a while cluttering your workspace or menus? Tool Launcher enables you to establish scripts whenever you want it without needing to manage floating windows that get in the way. You free your workspaces and window menu, but could still get the scripts docked and fast offered. The very best of both worlds!

Gfx plugin details of Aescripts Tool Launcher v1.4.2 Full + Tutorials

The product is in the **After Effects Plugins category from AeScripts**, for more information about this post you can click on the home page link in the sidebar.

To search for similar products to Aescripts Tool Launcher v1.4.2 Full + Tutorials , **Does this product work on Windowns and Mac Os?** We mostly include the operating system in the title. if it is not written, it will work on Windows, and you can for the Mac version.

Tool Launcher comes Using tl_panel, which when opened resembles a vacant board, but paired with tl_list or tl_bar, this weapon may demonstrate any script UI panel with a click of a button.

tl_list also comes Using a hint of this own, because most scriptUIs could be revealed in this panel too. So now you've got two panels which may be customized to reveal whatever you'd like, whenever you want.

Kinds of orders

- Script: A script file to operate.
- OS: Any command Which Can Be conducted in the terminal
- Impact: Add an impact to all selected layers
- Cartoon Preset: Employ cartoon preset documents to selected layers
- JavaScript: Compose javascript directly within Tool Launcher.
- Iii: An expression that may be applied to all selected properties.
- Menu Control: Any control from After Effects menus.

- Load folders and set them in a searchable listing or in committed toolbars.
- Establish icons for toolbar buttons.
- 1 fundamental settings window to customize all tools, options, and toolbars.
- Store the config file in almost any place.
- Display interfaces for scripts, which normally must be from the ScriptUI folder/Window menu, in pre-docked panels.

A number of panels:

1. Tl_panel: Show script ports,
2. Tl_list: Searchable listing of tools,
3. Tl_bar: Flexible toolbar panels. Can be reproduced to have several toolbars.

- Produce shareable config documents with tools configured, together with modifier keys, icons, and toolbars.
- Copy the config file between computers and all of your preferences, icons, and toolbars will soon likely be contained.
- Publish ft-toolbar config files.

v1.4.2:

- Fix macOS Catalina compatibility
