The pack contains 11 presets and a New York City photography guide. There are also 10 New York city wallpapers. These presets were inspired by New York City's mood and feel. These presets can be used to enhance photos taken in different lighting conditions, including rain, snow, sun, sunset, and even snow. These filters help photos attain rich, crisp colors. They also include many of the same editing techniques that I use on my Instagram images.

Most Frequently Asked Questions

What's included?

- 11 Lightroom Desktop Presets
- City Photography Guide
- 10 New York Phone Wallpapers

What's the difference between mobile and desktop presets?

This preset pack is for RAW files only and can be used with Lightroom Classic desktop only. These presets are not compatible with Lightroom Mobile.

Do you still require additional editing?

Presets can be a great way to start editing photos, but you will still need to adjust the brightness, color balance and saturation to achieve the best effect.

How can I get the presets?

After payment has been made, you will receive a download link. Also, the preset files will be emailed to you.
