"Topaz Photo AI" Samples:

Users can manually adjust effects to upscale the image or choose from automated restoration methods. Topaz Photo supports the most common image formats, including RAW. An Autopilot feature also recognizes faces and other significant parts of the image. There is no need to compare images manually; users can adjust the enhancement settings and instantly see the changes made.

It is affordable because a premium license is not required for the trial version. Many projects benefit from this software due to its ability to process images individually or in batches. Some key features of the software are its powerful AI-based processing, multi-format compatibility, several enhancement tools, and user-friendly interface.
