Aescripts Color Grade Prompter v1.2.3 (Win): Introducing Color Grade Prompter, an AI-powered color grading tool for seamless integration with After Effects and Premiere Pro.

Revolutionize your color grading process with the power of AI. Describe, export, and achieve stunning visuals effortlessly with Color Grade Prompter.

How to get the color grading process using artificial intelligence?

You can use "Aescripts Color Grade Prompter".

Where can I download the product?

After subscription, You can download it for free from here.

- **Intuitive Grading Experience:** Our custom-developed model ensures a smooth grading experience. Describe your desired look using natural language or layers, and receive instant feedback.
- **LUT Export Functionality:** Easily export your grading to a .cube LUT file, allowing you to lock in your grade and apply it across various editing suites supporting LUTs. Flexibility at your fingertips.
- **Interpolation Control:** Exercise complete control over the influence of different prompts, with the option to smoothly interpolate between them. Achieve the perfect blend for your footage.
- **Super Fast Performance:** Experience high-speed grading, even with 4k footage. While NVIDIA GPUs or Metal-accelerated Macs offer a performance boost, the CPU-only version maintains good speed. Exporting the grade to a LUT and using it natively, such as with Lumetri Color, further enhances rendering speed.
- **Premiere Pro Integration:** Effortlessly grade your footage in Premiere Pro by changing the clip's name. Export colors as a LUT, allowing easy sharing with others.
- **Compatibility:** Color Grade Prompter runs on After Effects 2022 and above. To ensure compatibility with your configuration, take advantage of the free trial before purchasing.

What is Aescripts Color Grade Prompter?

Aescripts Color Grade Prompter is a script tailored for Adobe After Effects, a widely-used platform for motion graphics and visual effects. This tool aids users during color grading by offering real-time prompts and suggestions specific to the current frame. By recommending adjustments like brightness, contrast, saturation, and color balance, Color Grade Prompter aims to optimize the color grading workflow, fostering efficiency and creativity. Its goal is to empower users to effortlessly achieve their desired visual aesthetics within their projects.
