

CData Arc v22.0.8328 (24 Oct 2022) for Win + License Key

2025-02-02 16:11:56 [label](#) [我要反馈](#) [下载页面](#)

Create fast, simple, and secure EDI MFT, EDI, and API workflows integrated with your cloud or on-premises application. There is no code to write.

Utilize our drag-and-drop visual workflow creator to connect, integrate and automate B2B processes.

CData Arc connectors allow you to link data movement and processing into any back-office software or database you want to use.

- ERP
- Marketing Automation
- Collaboration
- E-Commerce
- CRM
- Accounting
- NoSQL
- ... and much more

CData Arc Great Features:

API, as well as application integration

Instantly connect to APIs from external partners or internal applications. You can connect to external APIs, internal apps, and services without custom programming and ongoing maintenance.

Integration of EDI

Regardless of your specific industry EDI needs, CData Arc supports every primary EDI standard and protocol, including X12 FHIR, HL7, X12, and EDIFACT.

Top-of-the-line connectivity

CData offers the industry's most extensive catalog of connectivity solutions. CData gives you access to more than 85 applications and more than 250 data sources.

Integrations with no code

Make integration easier from end-to-end using a library of pre-built industry workflows to connect your trading partners from outside with all of your documents, applications, and processes.

Secured managed transfer of files

CData Arc is Drummond Certified for AS2 messaging and file transfer, which supports major MFT standards such as AS2, AS4, OFTP, SFTP, and more.
