CData Drivers for Microsoft Planner offers a comprehensive solution for integrating live Microsoft Planner data with various reporting tools, databases, and custom applications. These drivers enable seamless connectivity to Microsoft Planner data through standards-based drivers, facilitating effortless data integration for BI, reporting, analytics, ETL tools, and custom solutions. With the ability to connect from anywhere, users can easily access live Microsoft Planner data, enhancing data-driven decision-making processes.

CData Drivers for Microsoft Planner excel in BI and analytics tasks, providing fast query performance, comprehensive access to Microsoft Planner data and metadata, and seamless integration with popular analytics tools. This ensures users can leverage real-time Microsoft Planner data for informed decision-making and robust data visualization. Additionally, the drivers support ETL, replication, and warehousing tasks, extending favorite ETL tools with Microsoft Planner connectivity for efficient data movement and management.

Furthermore, support a wide range of database protocols, including ODBC, JDBC, and ADO.NET, enabling connectivity from various database management applications. They integrate seamlessly with workflow, automation, and developer tools, offering straightforward access to Microsoft Planner data for data migration, BPM, and application development. Additionally, the drivers provide advanced data virtualization features, abstracting Microsoft Planner data into a virtual database layer and supporting query federation for enhanced data access and management flexibility.

This package includes the following components:

- Excel Add-In for Microsoft Planner

- Microsoft Planner ADO.NET Provider
- Microsoft Planner BizTalk Adapter
- Microsoft Planner Data Cmdlets
- Microsoft Planner FireDAC Components
- Microsoft Planner JDBC Driver
- Microsoft Planner MuleSoft Connector
- Microsoft Planner ODBC Driver
- Microsoft Planner Power BI Connector
- Microsoft Planner SSIS Components
- Microsoft Planner Tableau Connector

Key Features of **CData Drivers for Microsoft Planner** :

1. Connect live Microsoft Planner data with BI, reporting, analytics, and data visualization technologies
2. Comprehensive access to Microsoft Planner data and metadata for robust query performance
3. Integration with favorite ETL tools for efficient data movement and replication
4. Connectivity from various database management applications through ODBC, JDBC, and ADO.NET protocols
5. Seamless integration with workflow, automation, and developer tools such as BizTalk, MuleSoft, and SQL SSIS
6. Data-centric model simplifies integration, allowing developers to build applications faster
7. Virtual database abstraction enables query federation and advanced data virtualization features
