**Virtual Studio Set – S08 - AE Project VH-37918625:** It's a photorealistic application that is suitable for all kinds of programs such as dialogue, news, business sports, weather, and story-based programs. This project is constructed as a complete 3D scene that includes 13 cameras as well as the ability to include your own cameras in the scene at your discretion. The camera movements are built off real-time broadcasting programs that meet every need and have special controls to transform the presenter's placeholders. The program is easy to use and is a single scene ( comp ) that has many layers and cameras that allow you to provide a clean and simple experience. Be aware that the maximum time it takes needed to render 3D model and 3d textures take between five and seven minutes for my personal desktop computer ( Nvidia GTX 1070 - Intel i7-7700HQ CPU with 32GB RAM ) However, the rendering speed is quick.
