### Panel UI Controls

- Angle: the angle of this Shadow (1 - 359)
- Scale: the span of The shadow (1 - 100). It is a relative value based upon the item size and it Varies from a dark angle. Sharp angles create more shadows.
- Blur: shadow Dispersion number in pixels (1 - 100)
- Opacity: that the opacity of the shadow (1 - 100)
- Shade: the color of this shadow. Usually out on a bright day shadows generally get a bluish tint.
- Sun Position: it is a feature that simplifies the angle of the shadow predicated On the comparative position of the item from the Sun (point established utilizing the Pen tool in Photoshop).
- Auto-update: activates The shadow production process when one of the above-mentioned parameters are shifted. It Makes it simpler to find a desirable look for this shadow.

**Bonus feature:** Shadow parameters are stored in the Current session of this Photoshop even when the panel is shut and re-opened later.
