Unity Asset - Asset Hunter PRO v2.2.18:

Introducing Asset Hunter PRO, the ultimate solution for managing your Unity projects' assets with ease and efficiency. Built to streamline your workflow, Asset Hunter PRO is a comprehensive tool designed to identify and manage unused or duplicate assets within your project folder, empowering you to optimize your build size and enhance overall project organization.

What sets Asset Hunter PRO apart is its compatibility with Unity's render pipelines, ensuring seamless integration with the Built-in Render Pipeline, Universal Render Pipeline (URP), and High Definition Render Pipeline (HDRP). Whether you're aiming for high-fidelity graphics or optimized performance across various platforms, Asset Hunter PRO has you covered.

This major upgrade from Asset Hunter 2 marks a significant leap forward, as it has been meticulously rewritten from the ground up. With enhanced features, improved UI, and superior performance, Asset Hunter PRO delivers a refined user experience and drastically reduced analysis times.

Is Asset Hunter PRO right for you? If you've ever faced challenges such as managing build size, identifying asset references, dealing with clutter from placeholder graphics, or procrastinating on deleting auto-generated materials, then Asset Hunter PRO is the tool you need.

Asset Hunter PRO provides a comprehensive overview of your project's assets, grouping results by folders and file types for easy navigation and cleanup. Additionally, it displays the uncompressed size of assets used in the build, empowering you to optimize your project's footprint effectively. Need to pinpoint which scenes utilize a specific asset? Asset Hunter PRO can provide that information too.

But that's not all – Asset Hunter PRO introduces two powerful new features: Dependency Graph and Find Duplicates. The Dependency Graph allows you to visualize how assets reference each other, facilitating better understanding and management of your project's asset dependencies. Meanwhile, the Find Duplicates feature identifies any duplicate assets within your project, ensuring optimal resource utilization and eliminating redundancy.

With Asset Hunter PRO, you can efficiently clean up your project, optimize your build size, and enhance overall project organization with just the click of a button. Say goodbye to obsolete assets and unnecessary clutter – Asset Hunter PRO is your essential companion for asset management in Unity projects.
