INSTRUCTIONS

There are three methods to apply overlays of photos:

1. Using Overlay Actions (include)
2. Utilizing Quickstart PSD course (include only in the PRO version)
3. Standard, Drag'n'Drop technique

1ST WAY: OVERLAYS ACTION

This approach is more advanced since it lets you rapidly apply overlays from any folder, including that of other sellers. When you set the action parameters, you can assign the F3 hotkey (for instance) to ensure that you can call this action with one click.

- Double-click the overlay Actions. Atn the file to import it into Photoshop. Once installed, you can access the Actions panel in Photoshop by clicking the menu 'Window > Actions.' There are two actions available: JPEG and PNG Overlays. The distinction between Overlay Action JPEG and Overlay Action PNG is that JPEG uses the Screen Blend Mode.
- Find the overlay Action and then press Play the action you want.
- A Photoshop dialog box appears and prompts you to choose the file. Click Continue, locate the folder you unzipped, and choose the picture you want to see. This image will instantly be uploaded to your Photoshop file, where the image

is opened.

- Reflect, scale, or rotate the overlay if you'd like.
- Click Cmd (Ctrl) + Enter, and the action will result in a layer mask and two layers of adjustment. If needed, apply a black paintbrush over the layer mask to cover the image and, in the correction layers, alter the Levels or color so that the overlay appears suitable to the photo.
- Make sure to save the image and show it to your customers; they will be amazed by the outcome

2ND WAY: Quickstart PSD COURSE

This technique lets you work with a Photoshop file in which you can choose the overlay you prefer, making the layer viewable. This is useful because it is visible in thumbnails in the image. However, it is a hassle that, in specific versions of Photoshop, the file might not be able to open correctly. This feature is not required and is provided as is.

3RD WAY: DRAG'N'DROP

- 3.1 Drag the folder to any image you want to place in the Photoshop file. When working with images with black backgrounds, select the Screen Blend Mode. Double-click the layer to change the blend mode, and the layer styles window will appear. Change the blend mode and move on to the next step. If overlays have transparent backgrounds, you don't have to change anything.
- 3.2 Scale transform, reduce the opacity, or apply a Layer Mask and Paint over your overlay.
- Compatible with any program that uses layers (Photoshop CS5+, Photoshop Elements, Paint Shop Pro, etc.)
- 125 JPG files
- Width 4500 px
- Photoshop Action for Easy Applying
