Illustrate Asset UPnP Premium is an audio server built for high-quality streaming and advanced browsing of compatible UPnP devices. It allows media sharing from computers, servers, and NAS devices to be played through multiple audio players on a home network. Some key features are internet radio, dynamic playlists, search and filtering, support for many audio formats (including DSD and DFF), Audio streaming in real-time from a PC, volume levelling through ReplayGain, and many more. Asset UPnP works in the background and allows customization of the browsing structure and the creation of multiple library instances. It's unique for its particular organization of albums and attention to playback quality relative to other UPnP servers.
