**Bundle 27 – North American Home & Garden Plants:** This Bundle 27 contains 15 trees and shrubs in 3D to be used in gardens, sceneries, and North America's landscaping requirements, with 75 unique and photorealistic high-quality 3D plant models available in various shapes that can be used in the majority of your scenes. 3DS MAX BLENDER, CINEMA 4D, and SKETCHUP formats make it easy to use little effort to load and render your scenes or projects, and with the GrowFX format, you get the most flexibility to alter the plants however you'd like.

Each model was created with the most excellent possible quality that accurately represents species used for Corona Renderer, V-Ray Renderer, and FStorm Render in 3D Max.

Our FBX file format includes all textures, which can be imported into other programs.

Our SketchUp file type is compatible with three rendering engines: V-Ray, Thea, and Enscape, with proxies included. SketchUp is fully capable of being used with Skatter. V-Ray 5 is compatible.

Users also have the choice to select Blender using Cycles and Cinema 4D with V-Ray 3.6 and Corona Renderer.

MESH models that need 3Ds Max 2018 or higher and a minimum of Corona 3.0, V-Ray 3.6, and Form 1.35. We also offer the complete Forest Pack library for all three renderers.

### List of Species:

- Berberis Thunbergii f atropurpurea 'Gentry'
- Clethra Alnifolia 'Sixteen Candles'
- Cornus Florida
- Cotinus Coggygria 'Royal Purple'
