Build A Motion Graphics Template: Advanced Adobe AE: I'll show you how to start creating your personal motion graphic templates in this class. These templates were created using After Effects but can be used and customizable with Premiere Pro. I'll show you how to utilize the Essential Graphics Panel in After Effects to design custom controls for your style. You'll need to use some expressions to create an interactive template, But don't be afraid! Utilizing code to create motion designs isn't as difficult as you may believe, and once I show you how to utilize expressions in your work, you'll never go back.

Motion Graphics Templates are a massive time saver in lots of ways. This course is ideal if you're creating templates for a group of editors, selling templates on the internet, or simply looking to understand the latest After Effects workflows. At the end of this class, you'll have complete confidence in incorporating expressions into motion design projects using the graphics panel and exporting your custom motion graphic templates.

This is a more advanced class. Before attending this course, you should have a basic knowledge of Adobe After Effects user interface and capabilities. Each step will be thoroughly described in every video. However, we won't spend time studying the basics of tasks.
