There is a negative news of the Excel file with the help of the XLSReadWriteII. the user does not have to install the Excel or some of the application to the software in order to use this tool. It should be noted that the XLSReadWriteII basically utilizes the only manager which is optimized for the process of preserving off the cell values.

This usually means that the user has the ability to work with bigger files and wherever the document does not match in the memory, then there are direct read as well as direct write styles available that permit the user and developer in order to process the file into the disc easily and flexibly. stability is considered to be among the greatest aims of the XLSReadWriteII which they have, and it was supposed to produce something which will not basically corrupt the document of the Excel and it will not change any information which is in the document itself.

The motor which manages the document of the XLSX basically automatically being created from the file format specification directly along with the specially developed instruments. It has the capability to guarantee the maximum compatibility to the users and developers. It had the capability to publish the initial version of the XLSReadWriteII in the year 1998 and at the same time it had been the only element that had the ability to read as well as write the Excel 97 + file for the users. It is committed to the processing the alternatives of the top Excel for the Delphi and so on.

Axolot XLSReadWriteII Great Features:

It has the following features and attributes that are stated as below such as:

- It has the capability to read as well as write any value of the sale which can be numeric or string, Boolean or error cells.
- It has the capability to provide the full support for the formulas for the user any permits the user to use the function as well as the formulas along with the references to the workbooks that are external easily and flexibly.
- The user has the capability to read the result directly from the external references that are available.
- Formatting of it is very easy by the process of addressing the cells and being able to access the formatting properties.
- It permits the user in order to read the values of the cells as well as the strings that are formatted according to the rules of the particular cells.
- It permits the user in order to access all the printing options that are available such as printing, selecting the size of the paper as well as setting the margins, setting header as well as footer which includes formatting of the codes and so on.
