Blender Market - Flock Generator:

FlockGenerator is a high-performance add-on designed to populate scenes with massive, realistic bird flocks, adding an immersive, lively element to any environment.

Optimized for both efficiency and realism, this tool enables the effortless addition of customizable bird flocks with drag-and-drop functionality. Its low-poly models and innovative Geometry Nodes setup ensure a balanced performance, making it suitable for large-scale scenes that require naturalistic movement patterns. FlockGenerator is adaptable to various settings, with flight paths easily adjustable through curve-guided motion controls, bringing an extra dimension of detail to coastal, urban, and atmospheric scenes.

Drag and Drop: Easily add bird flocks to scenes from the asset browser for quick integration.

High Performance: Optimized models and Geometry Nodes allow for large flocks with thousands of birds while maintaining system efficiency.

Low-Poly Realism: Designed to look realistic from a distance, ideal for large-scale environments.

Curve-Guided Motion: Customize flock movement and formations with editable curves, offering total control over flight paths.

Preset Bird Flocks: Includes specialized presets:

- **Seagulls:** Suited for coastal or seaside scenes.
- **Doves:** Ideal for both urban and rural settings.
- **Crows:** Adds a mysterious atmosphere for darker or eerie scenes.
